

REMARKS

The present Amendment is supplemental to the Amendment After Final Action submitted on November 6, 2003. Claims 1-24 are presented for examination, of which Claims 1, 8, 9, 20, 23, and 24 are in independent form. Claims 1, 9, and 23 have been amended to define still more clearly what Applicant regards as his invention, and Claims 15, 16, 18, and 19 have been amended as to a matter of form. Favorable reconsideration is requested.

In the Amendment submitted on November 6, 2003, Applicant, among other things, amended independent Claims 1, 9, and 23. These claims were amended to recite an apparatus/method for processing images of a changing scene recorded from at least one of different viewing positions, different viewing directions, and at different times to generate data for defining a sequence of images conveying an evolving representation of the scene.

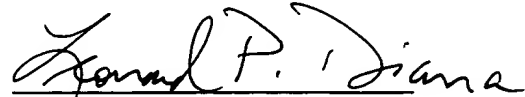

Applicant in this current Amendment has amended Claims 1, 9, and 23 to make clear that these claims relate to an apparatus/method for processing images of a changing scene recorded at different times from at least one of different viewing positions and different viewing directions.

In view of the foregoing amendments and remarks, and the reasons for patentability set forth in the Amendment After Final Action submitted on November 6, 2003, Applicant believes Claims 1-24 are patentable over the cited prior art.

Applicant respectfully requests favorable reconsideration and early passage to issue of the present application.

Applicant's undersigned attorney may be reached in our New York Office by telephone at (212) 218-2100. All correspondence should continue to be directed to our address listed below.

Respectfully submitted,

A handwritten signature in cursive script, reading "Ronald P. Diana".
